

Editor's Comment:

considered for publication after mini modification.

1, The topic is closely clinical PFI
and realistic pediatric problems.

The research method is correct, the paper writing is serious, the attitude is scientific and rigorous. In particular, the diagrams are very clear and satisfactory.

The thesis and research data are reliable and reliable.

Correct statistical methods.

5,; There are 24 references of the article .the references is enough but be add new one article of 2023-2024 .
