

**Review Form 1.7**

Journal Name:	<b>Asian Journal of Agricultural Extension, Economics &amp; Sociology</b>
Manuscript Number:	<b>Ms_AJAEES_117177</b>
Title of the Manuscript:	<b>The Extent of Awareness level of Sugarcane Farmers on Crop Residue Management Innovations</b>
Type of the Article	<b>Original Research Article</b>

**Review Form 1.7**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b><u>Compulsory</u></b> REVISION comments</p> <ol style="list-style-type: none"> <li><b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</li> <li><b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</li> <li><b>Is the abstract of the article comprehensive?</b></li> <li><b>Are subsections and structure of the manuscript appropriate?</b></li> <li><b>Do you think the manuscript is scientifically correct?</b></li> <li><b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></li> </ol> <p><b><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></b></p>	<p>Overall, this manuscript contributes to the promotion of environmentally friendly agricultural practices and underlines the importance of education and support in the sustainable management of crop residues.</p> <p>The article's title, "Level of Awareness of Sugarcane Farmers regarding Plant Residue Management Innovations," is appropriate based on the content of the research paper. The title accurately reflects the main focus of the research, namely assessing the level of awareness of sugarcane farmers regarding innovations in crop residue management. An alternative title could be "Assessing Sugarcane Farmers' Awareness of Crop Residue Management Techniques" to provide a more concise and direct representation of the research objectives.</p> <p>Overall, this manuscript contributes to the promotion. An article abstract should be comprehensive because it provides a clear picture of the research objectives, primary findings, and implications. of environmentally friendly agricultural practices. It also underlines the importance of education and support in the sustainable management of crop residues.</p> <p>The manuscript has included appropriate subsections and structure to organize the content effectively.</p> <p>Overall, the manuscript appears scientifically sound in assessing farmers' awareness of crop residue management innovations. By including additional methodological details and addressing potential limitations, the scientific rigor of the study can be further strengthened.</p> <p>Suggestions for additional references to improve the manuscript: Include recent studies on crop residue management innovations in the agricultural sector to provide a broader context for current research. View literature on awareness campaigns and interventions promoting sustainable farming practices among farmers. It incorporates references discussing the impact of burning crop residues on the environment and human health to underscore the importance of adopting alternative management strategies. By including a list of references and citing relevant sources from recent literature, manuscripts can strengthen the credibility of research findings and provide readers with additional resources to further explore the topic.</p>	
<p><b><u>Minor</u></b> REVISION comments</p> <ol style="list-style-type: none"> <li><b>Is language/English quality of the article suitable for scholarly communications?</b></li> </ol>	<p>Overall, the language quality of the article appears appropriate for scholarly communication, with room for minor improvement to further enhance the clarity and precision of the content.</p>	
<p><b><u>Optional/General</u></b> comments</p>	<p>Overall, the manuscript appears scientifically sound in its approach to assessing farmers' awareness of crop residue management innovations. By including additional methodological details and addressing potential limitations, the scientific rigor of the study can be further strengthened.</p>
