<p><b>Optional/General</b> comments</p>	<p>- <b>There are lack of logical connections among paragraphs and fragmented ideas</b></p> <p>- For publication purposes, using journal articles is better than other non-scientific reports</p> <p>- The soil seed bank experiment is omitted while some indications are there in the introduction, method, and discussion sections.</p> <p>In general, I feel that the author(s) is junior for research and publication. To encourage him/her/them to become a scientist, the manuscript can be published after serious corrections.</p>
