Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes,as patients' awareness of the allergic response to common allergen & their sensitivities will aid their commitment to avoid exposure to allergens,thus decreasing the incidence of hypersensitivity reactions. This article also lets the reader know about methods for endo-typing non-IgE-mediated hypersensitivity viz; Leukocyte Adherence Inhibition Test (LAIT) and the Tube Titration of Precipitins (TTP) on serum.Sublingual immunotherapy drops are a highly effective treatment for <i>D. farinae</i> allergy by increasing the subsets of T immune cells-Th17 cells and CD4⁺CD25⁺ regulatory T cells (Treg cells), in peripheral blood.This helps in prompt treatment too.</p> <p>Endotyping Non-IgE-Mediated Immunoreactivity to Dermatophagoides farinae: Implications for Allergic Patients—Retrospective Study</p> <p>Yes</p> <p>Review of previous studies,if available,to be added</p> <p>Yes</p> <p>Yes</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<p>Spacing between words is not maintained at some places in the article</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes. Kindly please write down the ethical issues here in details)</i></p>
