PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Healthcare workers can prove to be an important reservoir of potential pathogens which can be a source of hospital-acquired infections to susceptible patients. Staphylococcus aureus has been known to be the most common commensal with predominant hand and nasal carriage and MRSA strains if isolated are a known hazard for susceptible patients. So regular surveillance among health care workers is the need of the hour.</p> <p>2. Detection of MRSA carriers among Health care workers in a Tertiary Care Hospital.</p> <p>3. Some corrections to be made in the abstract</p> <p>4. Yes</p> <p>5. There are some technical corrections to be made in the methodology</p> <p>6. Yes</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Grammatical errors need to be rectified</p>	
<p>Optional/General comments</p>	<p>Methodology about isolation of S.aureus in the lab is unclear.</p> <p>Lot of language and grammatical corrections to be made in the manuscript.</p>
