

Editor's Comment:

The manuscript Title: The Manuscript Title Economics of Various Treatments of Vermicompost on Growth and Yield Attributes of Pea (*Pisum sativum* L.) based Intercropping System, it is a moderate type of contribution.

The initial manuscript has only 8 old references, despite the recommendation of referees, a further 7 references were added.

The entire manuscript contains only two tables, which are not cited in the text to conjugate them in the present research.

MATERIALS AND METHODS: A field experiment were (was) carried out in (on) vegetable farm

The manuscript has several typographical errors, it is suggested to check it, using Grammarly software.

The caption of Table 2: spelling of equivalent is given as quivalent

It can be considered for publication, after considering the above observations.
