

Review Form 1.7

Journal Name:	Asian Journal of Research in Crop Science
Manuscript Number:	Original Manuscript_AJRCS_117622
Title of the Manuscript:	Comparative Study of Prilled Urea and Urea Super Granule on Growth and Yield of Boro Rice
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Important</p> <p>2. Suitable</p> <p>3. Comprehensive</p> <p>4. Appropriate</p> <p>5. Yes, it' correct</p> <p>6. Nothing</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>1 It's okay</p>	
<p>Optional/General comments</p>	<p>As a research aimed at studying the comparative performance of PU and USG on the yield, yield and N uptake components of Boro rice, the results of this research have answered clearly. Further research is needed on the same commodity, location and type of rice, which is aimed at calculating additional labor costs due to the application of this method of applying Urea fertilizer, which will ultimately be able to calculate the BC ratio and changes in farmer income.</p>
