### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljesbs.com/index.php/JESBS/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <ol style="list-style-type: none"> <li><b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</li> <li><b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</li> <li><b>Is the abstract of the article comprehensive?</b></li> <li><b>Are subsections and structure of the manuscript appropriate?</b></li> <li><b>Do you think the manuscript is scientifically correct?</b></li> <li><b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></li> </ol> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p><b>The comments are in the text of the article.</b></p> <ul style="list-style-type: none"> <li>➤ If the research variables are to be explained one by one, it is recommended to first state the relationship between the variables in a scientific way and explain the importance and necessity of the topic.</li> <li>➤ A scientific article must have references. The theoretical foundations and which theorist or researcher the definition is related to should be referenced at the end of the sentence.</li> <li>➤ According to Ryff (1990), psychological well-being has 6 factors. You wrote 5 factors and did not include autonomy.</li> <li>➤ In the previous paragraph, the author of the article claimed that not much work has been done, in this part, he has given a lot of research evidence. This is an obvious contradiction.</li> <li>➤ Also, it is not necessary to state all these research evidences. It is recommended to combine research evidence with variables and present it in one section.</li> </ul>	
<p><b>Minor</b> REVISION comments</p> <ol style="list-style-type: none"> <li><b>Is language/English quality of the article suitable for scholarly communications?</b></li> </ol>	to some extent	
<p><b>Optional/General</b> comments</p>
