

Review Form 1.7

Journal Name:	Microbiology Research Journal International
Manuscript Number:	Ms_MRJI_117522
Title of the Manuscript:	Quality control of the biological properties of hydrazide-hydrazone derivatives from strains responsible for food poisoning isolated from food sold on the corridors of the town of Daloa (Côte d'Ivoire)
Type of the Article	Research

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Yes, the manuscript entitled "Quality control of the biological properties of hydrazide-hydrazone derivatives from strains responsible for food poisoning isolated from food sold on the corridors of the town of Daloa (Côte d'Ivoire)" is an attempt to determine efficacy of newly synthesized chemicals to enhance food safety and shelf life. However, there are few points for kind consideration.</p> <p>2. Manuscript title need be revised as it is confusing. It could have been "Evaluation of antimicrobial efficacy of hydrazide-hydrazone derivatives against food borne pathogens". Further, thorough revision of the whole manuscript is required to improve English language for better clarity and understanding of the readers.</p> <ul style="list-style-type: none"> • Whether the used chemical are safe means research data on their toxicity available? • Whether the isolated strains were identified by phenotypic, biochemical and genetic tools for their virulence? • Materials and method to revised in concise manner. No need about details of demography and individual materials. • References also require revision 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	It require thorough revision.	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
