PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<ol style="list-style-type: none"> Yes, a manuscript exploring the potential relationship between periodontal disease and Alzheimer's disease could be important for the scientific community. Both periodontal disease and Alzheimer's disease are significant health concerns, and if there is a demonstrated link between them, it could have far-reaching implications for both medical and dental care. Understanding any potential connections between these two conditions could lead to advancements in diagnosis, treatment, and preventive measures for both diseases. Additionally, an integrative review can provide valuable insights by synthesizing existing research and highlighting areas for further investigation. Alternative title that can be used- "From Oral Hygiene to Cognitive Health: Examining the Relationship Between Periodontal Disease and Alzheimer's" Yes No of table or structure is less Yes More and recent references can be used to explore the review little more. 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	1.Yes	
<p>Optional/General comments</p>	Table no. one can be arranged in systematic way ; study years are not in ascending or descending order.
