

Editor's Comment:

The reviewed manuscript (2024/ARRB/117601) entitled, "A review on the health implications of electromagnetic radiations emitting from cell phone towers" for a final decision. I am glad to read this good piece of review paper and found that the authors have done wonderful jobs in revising their manuscript based on the scholastic comments/suggestions raised by the reviewers as well as improved the manuscript in a befitting manner. However, there are still some minor mistakes in words and languages as well as formatting/arranging of citations and references, which need to be corrected/revised based on the prescribed guidelines of the journal before final printing. Therefore, I recommend it for publication as a full paper in Annual Research and Review in Biology with minor revisions.
