

## Review Form 1.7

Journal Name:	<a href="#">Asian Journal of Research in Surgery</a>
Manuscript Number:	Ms_AJRS_118715
Title of the Manuscript:	UNUSUAL LOCATION OF CYSTIC LYMPHANGIOMA OF THE PANCREAS: ABOUT A CASE AND REVIEW OF THE LITERATURE.
Type of the Article	Case report

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajrs.com/index.php/AJRS/editorial-policy> )

**Review Form 1.7**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</p> <p>2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</p> <p>3. <b>Is the abstract of the article comprehensive?</b></p> <p>4. <b>Are subsections and structure of the manuscript appropriate?</b></p> <p>5. <b>Do you think the manuscript is scientifically correct?</b></p> <p>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p> <p><b><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></b></p>	<p>1- <b>Yes</b>, While it is a single case report, the combination of its rarity, diagnostic/management challenges, and confirmatory histopathology make this a potentially important contribution to the scientific literature on an uncommon pancreatic tumor.</p> <p>2- yes</p> <p>3- Overall, while comprehensive, the abstract could be tightened and restructured to make it more clear, concise, and impactful in conveying the essentials of this pancreatic cystic lymphangioma case report</p> <p>4- the existing subsections cover the key components expected for a case report manuscript. Some adjustments to section lengths, use of further subsections, and consistent numbering/formatting could elevate the structural organization and flow of the content.</p> <p>5- While it is difficult to definitively conclude scientific accuracy without comprehensive peer review, the manuscript appears to present information about pancreatic cystic lymphangiomas that is consistent with current scientific understanding based on my analysis. The descriptions, diagnostic workup, treatment approaches, and pathological findings all seem scientifically appropriate for this rare condition.</p> <p>6- Including some more recent references would strengthen the manuscript and ensure the most up-to-date information on this rare condition is covered in the discussion.</p> <p><b>In addition: The following case report should be cited to provide context and highlight the rarity of these lesions, as well as the diagnostic challenges and the importance of surgical intervention, even in cases where the initial presentation may seem transient or non-specific:</b></p> <p><b>Shbani, Abdulrahmana; Toufan, Ebrahima; Martini, Nafizab,c; Yousif, Mayas A.d. A mesenteric cystic lymphangioma with no cysts' radiological findings on X-ray in a 16-month-old boy. Annals of Medicine &amp; Surgery 85(4):p 1051-1055, April 2023.   DOI: 10.1097/MS9.0000000000000316</b></p>	
<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>There are several grammatical errors and awkward phrasing throughout the text. Addressing these language and grammar points through careful editing and proofreading will strengthen the quality and professionalism of the manuscript.</p>	
<p><b>Optional/General</b> comments</p>	<p><b>The following case report should be cited to provide context and highlight the rarity of these lesions, as well as the diagnostic challenges and the importance of surgical intervention, even in cases where the initial presentation may seem transient or non-specific:</b></p> <p><b>Shbani, Abdulrahmana; Toufan, Ebrahima; Martini, Nafizab,c; Yousif, Mayas A.d. A mesenteric cystic lymphangioma with no cysts' radiological findings on X-ray in a 16-month-old boy. Annals of Medicine &amp; Surgery 85(4):p 1051-1055, April 2023.   DOI: 10.1097/MS9.0000000000000316</b></p>
