### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p><b>1. Is the manuscript important for scientific community?</b> Yes. The issue of pollution rising from transportation fuels should be a major concern for the scientific community. Since the article concentration is on transportation fuel whose use impacts on people a lot through the SOx in the atmosphere, it therefore becomes an important subject</p> <p><b>2. Is the title of the article suitable?</b> The title of the article is suitable</p> <p><b>3. Is the abstract of the article comprehensive?</b> The abstract needs to be expanded to present briefly the method of analysis, major findings and recommendations for the study</p> <p><b>4. Are subsections and structure of the manuscript appropriate?</b> The subsections and structure are appropriate. Change the subsection: <b>II.1.2. Results of sulphur content measurements on samples</b> To <b>III.1.2. Results of sulphur content measurements on samples</b></p> <p><b>5. Do you think the manuscript is scientifically correct?</b> I did not see statistical checks on the accuracy of results aimed at eliminating errors. If these are done, then the results will be adjudged accurate and the manuscript will be correct as presented.</p> <p><b>6. Are the references sufficient and recent? If you have suggestions of additional references, please mention in the review form.</b> They are sufficient for this subject and the scope covered.</p> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p>Yes.
