

Review Form 1.7

Journal Name:	Asian Journal of Physical and Chemical Sciences
Manuscript Number:	Ms_AJOPACS_118231
Title of the Manuscript:	DETERMINATION OF THE SULFUR CONTENT OF GASOLINE FROM FOUR MAJOR FUEL DISTRIBUTORS IN DAKAR
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes</p> <p>Yes</p> <p>No</p> <p>No</p> <p>No</p> <p>No</p> <p>The comments and suggestions are presented in a specific manner throughout the manuscript.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<p>The study is interesting as it brings analysis and evaluation of a component of a globally consumed petroleum derivative, namely sulfur in gasoline, which is a harmful element. Sometimes, due to operational severity, it is present in significant amounts and is released during consumption, causing health and environmental issues. Its monitoring is important, so we consider this study timely as it emerges at a time when environmental protection studies and the energy transition that the petroleum industry has been undergoing are paramount. Along with it comes a review of the quality policy of petroleum products concerning the percentage of this element, as well as the development of additives to inhibit them, acting in complement to the severity of operational processes. However, the writing and treatment of experimental data in the manuscript do not confer scientific quality, which is why we suggest several commented enhancements throughout the article.</p>
