Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>It is an important topic for scientific as well as for the business community. It could help in identifying the triggers for corporate implosions and could potentially provide the action plan to take necessary measure to avoid negative outcomes. However, in significance section author must discuss its value in the existing body of literature, what gap is and how this study is filling the existing gap in the literature. Are there any similar scientific studies on this topic or it's the unique one? If there are any existing studies, provide the reference, then must highlight how this study is different from those done before? What extra value does it add? Hence this study is based on studying the existing literature, so the literature must be very comprehensive; study misses out on the recent studies. Need to refer more recent literature and what are the current debates in the literature. Provide more recent reference preferably from past three years.</p> <p>Topic seems to be fine</p> <p>Abstract looks fine</p> <p>ok</p> <p>The paper effectively synthesizes existing literature, it would benefit from empirical validation through case studies or empirical research to strengthen the credibility of its findings. Incorporating real-world examples of corporate implosions and university closures in Africa would enhance the relevance and applicability of the study's insights.</p> <p>Study misses out on the recent literature. Author must study the recent literature, the latest reference is from 2021 and that too is only one.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<p>The paper could further enhance its theoretical framework by drawing upon established theories or conceptual models related to organizational failures and crisis management. By anchoring the analysis within a well-defined theoretical framework, the paper could provide a more structured approach to understanding the complexities of corporate implosions and intervention strategies.</p>
