

Review Form 1.7

Journal Name:	Asian Journal of Environment & Ecology
Manuscript Number:	Ms_AJEE_118198
Title of the Manuscript:	The Environmental Conservation Strategies used in Secondary Schools Align with Guidelines of United Nations Environmental Program: Evidence from a cross-sectional study in a City Setting
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. It is good to provide general information.</p> <p>2. Yes.</p> <p>3. It is not comprehensive so the author should make it more concise.</p> <p>4. These are appropriate.</p> <p>5. As I mentioned in item above if there is no one ever survey to collect the data from these sample group. It will provide basic information to conduct other research.</p> <p>6. The references are sufficient. The author provides the good methodology, but some results are not follow.</p> <p>The author must be aware about to select the proper statistical analysis.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>It is acceptable as survey information. If the author would like to use Pearson's Chi-square, followed by logistic regression analysis. He needs to plan to collect a greater number of sample. Moreover, the author must be aware not to mix the sample group of students, teachers, and administrator together.</p>	
<p>Optional/General comments</p>	<p>In the data analysis plan the author gives Pearson's Chi-square, followed by logistic regression analysis (to find patterns and relationships), at 0.05 significance level. There is an important to know that This statistic technique need a greater number of sample to be used for analysis. Moreover, there is no logistic regression analysis that appears in the result. Thus, the table 2 should not be included in the study.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
