

Editor's Comment:

Title Exosomes: A potential biomarker and therapeutic target for the treatment of diseases

Journal of Advances in Biology & Biotechnology

In addition to the revision comments I found the following.

- Article title not suitable and need correction.
- Article is importance for medicine research and diagnostic field and important topic in treatment of diseases.
- This article lacks to the scientific method and structure followed in such studies.
- Abstract not include the aim of this study and need to reformulate included the comperhensev information related the present study.
- Author must be given full name for all the short forms for the first time in all text .
- Results and discussion in the article are not scientific basis and must be expand in details with other studies relating with aim of study should have been expand discussed.
- References :
 - a- References are many but they are much older, not sufficient, not arranged in the text, and the article needs modern references.
 - b- References number 8, and 9 are present in references list (Red color) but not present in the text.
 - c- Reference, Sun et al. (0 0) present in the text (blue color) but not present in the references list.
- 8- Language and spelling mistakes are present in many places and need English editor to improve the quality of the article.
- 9- Author must strictly adhere to the journal's system in standardizing, and writing texts, structure and references.

Decision

This article requires the author to do the following:

- Do what is required from to 9 mentioned above in this decision.
- Reformulate the abstract, results and discuss them properly in light of analyzes and comparison

with others.

- The author makes the text corrections shown in red color.

Therefore

After the author has done everything required above in this article, the article is considered suitable for publication in this journal.
