

## Review Form 1.7

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_118234
Title of the Manuscript:	DNA barcoding of economically important fruit flies (Diptera: Tephritidae) from the lower Gangetic plains of eastern India
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://journaljabb.com/index.php/JABB/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</p> <p>2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</p> <p>3. <b>Is the abstract of the article comprehensive?</b></p> <p>4. <b>Are subsections and structure of the manuscript appropriate?</b></p> <p>5. <b>Do you think the manuscript is scientifically correct?</b></p> <p>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p>Yes, it is important because gene inheritance signifies individuality and how fruit flies survive and adapt to the environment.</p> <p>Yes, the title resembles the methodology of studying a group of fruit flies that have been from generation to generation in crop plantations specifically in the lower plain of Gangetic.</p> <p>Yes, the abstract is comprehensive and summarises all the details of genetic barcoding among the fruit flies. Yes, it is very well-defined and structured as the words and sentences that describe the whole process are relevant. Yes, the manuscript is scientifically well-proven by using a statistical approach as well to identify the new characteristics and sampling of fruit flies.</p> <p>The references are sufficient but not the most recent. However, the idea and quoting materials are relevant and reliable for future references in studying the same topic.</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>The language is very soothing and suitable for scholarly communications.</p>	
<p><b>Optional/General</b> comments</p>
