

Editor's Comment:

There are still glaring issues that need to be rectified before publication.

1. Section numbering and number leveling should be worked at. For example, Introduction should be 1.0, followed by 1.1; 1.1.1; 1.1.2; etc.
2. The font of table 3, should be reduced to enable the table fit in one page.
3. The authors have used the short form of Fig. I propose that they use the word Figure in full in both text and caption naming.
4. In the original manuscript, the authors have given a source for the figures. However, in the revised manuscript, the sources of the figures has been removed. I propose that the sources be provided and cited in both the text and reference list.
5. There is a big problem of referencing, both in the text and list. For example:
 - ❖ In page 2, the references are written as: Singh, R. P et al., 2016; Savary, S et al., 2000; Kumar P et al., 2018. This goes on to the next page. Please let the authors rectify this anomaly throughout the text.
 - ❖ Et al., should be checked and be consisted throughout the text. Some have a stop then comma before the year, some have only comma while others have none.
 - ❖ The authors should use one reference style in the reference list.

Decision:

The manuscript should be published in the journal after the suggested revisions have been applied.
