If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> 1. In my view it is a good topic for research, by this we can reduce abdominal delivery rates and complication associated with the procedure. 2. It is perfect. 3. Yes 4. Yes 5. Yes 6. Ok 7. There are some sentence needs grammatical correction words written in key words are not appropriate like it is written as post date pregnant , women. It should be written as postdated pregnancy. Word women is not specific to your study it is a common noun for an adult female. 8. It would be better if u give details about the criteria of riped cervix or when to stop giving further dose in methodology. 9. Define criteria of failed induction. 10. Table showing reason for abdominal delivery 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	It is ok	
<p>Optional/General comments</p>
