	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<ul style="list-style-type: none"> ➤ This manuscript is essential for many domains in clinical emergencies as well as for life style modifications. Collaboration among healthcare professionals, including primary care providers, gastroenterologists, dietitians, and pharmacists, is essential to tailor treatment plans to individual patient needs and minimize the risk of adverse events however to me it seems as the article is a bit scattered as sometimes Geriatric GI disorders are under discussion and sometimes other disorders are vaguely addressed and at different intervals ➤ "Optimizing Electrolyte Balance in Elderly Patients with Gastrointestinal Conditions: Approaches, Interventions, and Patient Outcomes" ➤ Article is comprehensive, subsections and structure are appropriate but grammatically few sentences are incorrect. ➤ The references are not recent at all. Few are even of 2001/2003.needs to get the latest references. ➤ The author needs to focus on jotting down points regarding all systems associated with electrolyte imbalance and then focus on GIT. Also, the other electrolytes in addition to sodium be addressed too. Abbreviations are used at the initial steps 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	No, it needs revision. Major flaws in English proficiency	
<p>Optional/General comments</p>	Discussion and Results can be more elaborated. results should come prior to discussion
