

Review Form 1.7

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_116380
Title of the Manuscript:	GEOELECTRICAL AND PHYSICOCHEMICAL CHARACTERIZATION OF GROUNDWATER CONTAMINATION AROUND A CASSAVA PROCESSING FACTORY IN OGBOMOSO, SOUTHWESTERN NIGERIA
Type of the Article	

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1.The manuscript is important for the scientific community The resistivity profiling and physicochemical analysis and findings are important for current and future references</p> <p>2.The title is suitable</p> <p>3.The abstract is comprehensive</p> <p>4. The structure is ok. However more subsections can be introduced for clarity</p> <p>5. The manuscript is scientifically correct</p> <p>6.References are recent however not sufficient for the two broad areas being discussed, more can be added</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The language is quality for scholarly communication</p>	
<p>Optional/General comments</p>	<p>METHOLODY A mix up in this area is evident. However it can be corrected by restructuring as follows: Restructure-</p> <ul style="list-style-type: none"> ✓ study area, ✓ theory of resistivity profiling, ✓ sample collection ✓ Sample analysis-on site analysis and laboratory analysis <p>RESULTS AND DISCUSSION Split into:</p> <ul style="list-style-type: none"> ✓ geoelectrical results and discussion ✓ physical results and discussion <p>DISCUSSION include statistical analysis on Physicochemical analysis</p> <p>enhance the discussion by comparing with results and values obtained by other researches from the country on Physicochemical analysis</p> <p>REFERENCES Add more references</p>	

Review Form 1.7

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
