(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>This is important however manuscript is poorly written.</p> <p>No—We would recommend authors to change the title.</p> <p>No— body of abstract lack enough information. Considering many physicians only read abstracts. This abstract did not provide enough details and information.</p> <p>No— authors did not write it as scientific/scholarly article such as authors frankly mentioned BMI and GCS without describing the full forms initially. Authors also mentioned very vague radiological features.</p> <p>Yes.</p> <p>Conclusion section was also poorly written. Authors did not describe how this manuscript is helpful and add more to the known body of knowledge on cerebral thrombophlebitis. Authors also did not describe future implications on the topic. Authors have used one word more than one time such as word dominates. Word selection in the scientific writing is done very carefully so that it reflects the accuracy.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Very poor</p>	
<p>Optional/General comments</p>	<p>As above</p>
