

Editor's Comment:

Approved for publication in your respected journal. However, I have some reservations as to:

- 1.The title. Add please to the title: The Philippines Case Study
- 2.In the abstract add: Conclusion and Recommendations
- 3.In the introduction no need to have 1.1 because , otherwise, where is 1.2 because when we break something at least there are two parts minimum
4. Results instead of Result on page 4
5. The font is different
6. Remove unnecessary spaces between the Tables
- 7.Table 3: The police are too small
8. Font is again different on pages 6, 7...
9. On pages 8 the font is again different on Table 5, and the figures on Table 6 are too small to read and to understand in order to come to a conclusion
10. Categories instead of category
11. Discussions instead
12. Conclusion and Recommendations: to be merged together.
