Review Form 1.7

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|---|--|---|
| <p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p> | <p>1. The manuscript makes a valuable contribution to the understanding of factors influencing life expectancy in Yogyakarta Province. With some enhancements in the literature review, data analysis clarity, and discussion depth, this study could significantly strengthen its impact and relevance to policymakers and researchers in public health.</p> <p>2. The topic of health facilities and personnel's impact on life expectancy is highly relevant, especially in regions where healthcare access may vary significantly. This research can contribute valuable insights to policymakers, healthcare professionals, and public health experts.</p> <p>3. The abstract and content provide a solid foundation for understanding the research on life expectancy in Yogyakarta Province. With some minor improvements in clarity, citation, and data presentation, the report can be further strengthened.</p> <p>4. The abstract is well-structured, providing clear subsections such as Aims, Study Design, Methodology, Results, and Conclusion. This organization helps readers grasp the study's essence quickly. The objectives and scope of the study are clearly stated, focusing on the impact of health facilities and personnel on life expectancy in Yogyakarta Province.</p> <p>5. The abstract demonstrates scientific rigor through the use of statistical tests (e.g., normality test, multicollinearity test) to validate the regression model and ensure the reliability of the results. The inclusion of previous research results adds context and shows how this study contributes to existing knowledge.</p> <p>6. It's crucial in academic research to use recent and up-to-date references. Most of the references cited in the abstract are from the past decade, which is generally acceptable. However, it's always beneficial to include the latest studies and publications to ensure the most current understanding of the topic.</p> | |
| <p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p> | <p>Yes The abstract is well-written overall, but there are some minor grammatical errors and awkward phrases that could be revised for clarity. Additionally, the transition between sections could be smoother to enhance the overall flow of the abstract.</p> | |
| <p>Optional/General comments</p> | <p>The manuscript makes a valuable contribution to the understanding of factors influencing life expectancy in Yogyakarta Province. With some enhancements in the literature review, data analysis clarity, and discussion depth, this study could significantly strengthen its impact and relevance to policymakers and researchers in public health.</p> | |
