

Review Form 1.7

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_115455
Title of the Manuscript:	Microcontroller-Based Security System for an Industrial Complex: Design, Fabrication and Testing
Type of the Article	Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The paper provides detailed information about the designing of microcontroller based system. This system can be easily deployed with the help of basic computer and the microcontroller kit.</p> <p>The title is suitable for the system given in the paper.</p> <p>The abstract could be improved by adding details about the results.</p> <p>The subsections related to designing are proper. However, system testing doesn't provide real-time monitoring information. The authors are advised to create a test table for invalid inputs too. The structure and content of the remaining subsections provide sufficient details of the system.</p> <p>Yes, the manuscript is scientifically correct and researchers can refer to it for the microcontroller based system designing.</p> <p>The authors are requested to include the references from 2018 onwards.</p> <p>The paper should provide advantages of the implemented system over the existing readymade circuits/kits.</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	<p>The paper has a scope to improve its English quality by applying grammar verification techniques.</p>	
<p>Optional/General comments</p>	<p>This paper can be published after major modifications.</p>
