

Editor's Comment:

Title : Carbon sequestration in the sugarcane plant-soil system and its impact on nutrient integration practices in the Indo-Gangetic plains of India.

Journal of Advances in Biology & Biotechnology

In addition to the revision comments found the following :

-Article title: 2. The topic is important but lacks scientific research methods.

2- The author needs to detail the components of the eight treatments used.

. Most of the references are old, and the author needs to add modern references that are in line with the context of the article and work to improve it.

- Reference Nosetto et al., 2006 is present in the bibliography but not in the text.

Conversely, the Walkley and Black 9 reference is in the text but not in the bibliography.

- The results must be reformulated and discussed to suit the statistical analysis of each treatment.

6- The author did not mention the correlation coefficient used in Table No. .

- The author must write the complete terms in a list or at the beginning of each time.

-

○ Authors must be make corrections as shown in red.

9- Authors must be follow the magazine's system designing, writing titles and references within the text and references.

Decision

This article requires the author to do the following:

- Do what is required from 1 to 9 mentioned in this decision.

2- Reformulate the results and discuss them properly in light of analyzes and comparison with others.

- The author makes the corrections shown in red.

Therefore,

After the author has done everything required above in this article, the article is considered suitable for publication in this magazine.
