<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>Yes</p>	
<p><b>Optional/General</b> comments</p>	<p>To the Authors,</p> <ol style="list-style-type: none"> <li>1. The sentences are lengthy and complex, making it challenging for readers to follow the information smoothly. Consider breaking down some of the longer sentences into shorter, more digestible ones to improve readability.</li> <li>2. Some sentences contain redundant information or unnecessarily repetitive phrases. For example, in the first paragraph, the phrase "With this in mind" can be removed as it doesn't add much value to the sentence.</li> <li>3. Ensure consistency in referencing studies and sources. For instance, in the paragraph discussing the prevalence of retinal diseases, there are multiple references cited within the same sentence, which can be confusing. Try to organize the references more clearly or cite them separately for each point.</li> <li>4. Verify the accuracy of statistical data and percentages provided throughout the text to ensure they are correctly reported and interpreted.</li> <li>5. Clarify ambiguous terms or acronyms to enhance understanding, especially for readers who may not be familiar with specialized medical terminology.</li> <li>6. Check for grammatical errors and typos to maintain professional writing standards.</li> </ol>
