

Review Form 1.7

Journal Name:	Journal of Scientific Research and Reports
Manuscript Number:	Ms_JSRR_113956
Title of the Manuscript:	Influence of Crop Geometry and Nitrogen Levels on Growth and Yield of Black Wheat (<i>Triticum aestivum</i> L.)
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Yes, the manuscript titled "Influence of Crop Geometry and Nitrogen Levels on Growth and Yield of Black Wheat (<i>Triticum aestivum</i> L.)" is important for the scientific community, particularly for researchers and practitioners in the fields of agronomy, crop science, and food security.</p> <p>2. Yes, the title of the article, "Influence of Crop Geometry and Nitrogen Levels on Growth and Yield of Black Wheat (<i>Triticum aestivum</i> L.)," appears to be suitable.</p> <p>3. The abstract of the article provides a concise summary of the study; however, it could be further improved to enhance its comprehensiveness</p> <p>4. it appears that the manuscript lacks clear subsections and structure. Here's how the manuscript could be structured for better organization.</p> <p>5. it appears that the manuscript outlines a scientifically conducted field experiment to evaluate the influence of crop geometry and nitrogen levels on the growth and yield of black wheat. The manuscript follows a structured approach, including details on the experimental setup, statistical design, and results obtained.</p> <p>6. The references provided in the manuscript appear to cover relevant literature on the topic of wheat cultivation, crop geometry, nitrogen fertilization, and related areas. However, without access to the full list of references, it's difficult to determine their sufficiency and recency definitively. Here are some suggestions for additional references that could enhance the comprehensiveness of the literature review.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The language and English quality of the provided article are generally suitable for scholarly communication. The text is clear and concise, conveying the methodology, results, and conclusions effectively. However, there are a few areas where improvements could be made for better readability and clarity.</p>	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
