

**Editor's Comment:**

The manuscript presents a great contribution to the field. My opinion is that the manuscript should be accepted after minor revisions.

Comments

1. Insert the study hypotheses;
2. The abstract should be self-explanatory and more detailed;
3. The purpose and method of the research should be further explained;
4. The discussion needs to be more thorough and based on the recent international literature;
5. In conclusion:
  - Answer the study hypotheses
  - Should include the future scope of the study.

The manuscript presents contribution to the field. My opinion is that the manuscript should be accepted after minor revisions.
