

Review Form 1.7

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_114349
Title of the Manuscript:	Characterization of flower phenology in Garcinia indica
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> the title of the article is appropriate, but I propose this modification to the title: <Biological study with morphological characterization of flower phenology in Garcinia indica Yes, it's comprehensive. the sub-sections and the structure of the manuscript are not appropriate, the conclusion and perspectives are missing Although the choice of subject is good and the results scientifically interesting, The references are sufficient and must be actualised 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	<p>It should be noted that this manuscript is written in a good English language, which is more or less understandable and clear. Despite that fact, I have some critical findings and comments on this work.</p>	
<p>Optional/General comments</p>	<ol style="list-style-type: none"> The introduction does not clarify the innovation points of this manuscript. What is the innovation of this article? Please highlight it in the article. It would be interesting to characterize the male, female and bisexual flowers of Garcinia indica by SEM-FEG and transmission electron microscopy (TEM) analysis to determine the evolution of grain size as a function of time.
