

Editor's Comment:

The manuscript entitled "Food Calorie Consumption and Vulnerability Status of the Rice Farmers in Ekiti State, Nigeria: Perspective for Commercialized" (2024/EJNFS/114074) provides relevant information about the socio-economic factors affecting food calorie consumption and vulnerability among rice farmers in Nigeria, and offering a basis to improve food security. The structure of the manuscript well designed and the methods including statistical analysis were appropriate. I agree with the recommendations made by Mencho about discussion, future directions, language and clear conclusion.

The manuscript was revised according to the reviewers opinions and recommendations, which were minor revisions.

I inform you that the manuscript can be accepted for the publication in EJNFS.
