

**Editor's Comment:**

Manuscript (2024/ARRB/112646) entitled, "Molecular characterization of mango (*Mangifera indica* L.) cultivars using SSR markers" for a final decision. I am pleased to read this comprehensive & interesting piece of research paper and found that the authors have done wonderful jobs in revising their manuscript based on the scholastic comments/suggestions raised by the reviewers as well as improving the manuscript in a good manner. However, there are still some minor mistakes/errors in wordings and languages as well as formatting/arranging of references, which need to be corrected/revised based on the prescribed guidelines of the journal before final printing. Therefore, I recommend the manuscript for publication in Annual Research & Review in Biology with minor revisions.
