

Review Form 1.7

Journal Name:	Asian Journal of Research in Agriculture and Forestry
Manuscript Number:	Ms_AJRAF_114079
Title of the Manuscript:	CHEMICAL FUNCTIONAL PASTING PROPERTIES OF FLOURS FROM PLANTAIN, MESQUITE SEED AND RICE BRAN
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> Yes, it is important for scientific community, as it will benefit several sectors from academia (research) to health to economy by enhancing the diet of some people with health issues. The title "CHEMICAL FUNCTIONAL PASTING PROPERTIES OF FLOURS FROM PLANTAIN, MESQUITE SEED AND RICE BRAN" seems suitable as it accurately reflects the content of the study, focusing on the chemical and functional properties of flours from various sources. The abstract provides a comprehensive overview of the study's aims, methods, and results, including detailed findings on the composite flour's chemical composition, mineral composition, and functional properties. However, it could be improved by briefly mentioning the methodology used to assess these properties. The subsections and structure of the manuscript appear appropriate, with a clear delineation of the different aspects studied, such as chemical composition, mineral composition, and functional properties. The manuscript is scientifically correct, presenting numerical data on the chemical and functional properties of the composite flour derived from plantain, mesquite seed, and rice bran. The references only have articles from past 15 years with only one 2023 reference, I believe the references should try to capture beyond 2009 as well to capture recent work being done in that spheres. 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Yes, the English quality is good.	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
