

Review Form 1.7

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_114472
Title of the Manuscript:	Studies on effect of IBA concentrations and planting times on propagation of rose (Rosa hybrid Vill.) through semi-hardwood cuttings
Type of the Article	

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1-yes</p> <p>2- No. I suggest adding different varieties to the title and eliminating the type of cutting</p> <p>3- No. The text of the results should be improved.</p> <p>4- yes</p> <p>5-No. Need for major modifications</p> <p>6-No.</p> <p>Ríos, M. R., Rocha, S. P., Niella, F., Keller, H. A., & Duarte, E. R. (2022). Factores que afectan el enraizamiento adventicio y brotación en estacas de <i>Hyptis australis</i> (Lamiaceae). <i>Revista peruana de biología</i>, 29(1).</p> <p>Ortiz, L. M., Ramos-Hentz, F., Schamne, D. R., & Duarte, E. R. (2021). Efecto del sustrato y el ácido naftalenacético en la propagación vegetativa <i>Hypericum brasiliense</i> (Hypericaceae). <i>Manglar</i>, 18(4), 363-368.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>NO. Correction by a language specialist is required.</p>	
<p>Optional/General comments</p>	<p>The methodology should be described in more detail, i.e. it should include where the plants from which the cuttings were obtained were located, did they have any previous treatment. How the hormone was applied and for how long. What substrate was used, what type of pots were used. Where they remained, for how long and what were the environmental conditions where they remained until the variables were evaluated.</p> <p>In results and discussion you should modify the whole text, as it is confusing and not understandable, as well as the tables (see example table). The author is not clear what his treatments are and therefore describes the same thing several times. If you incorporate one or more tables, these should be mentioned in the text when mentioning your data. The author is also unclear how to describe the outcome of the interactions. I suggest a complete rewrite taking into account which are the treatments and mentioning the variables one by one.</p>	

Review Form 1.7

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
