| <p><b>Compulsory</b> REVISION comments</p> <p>1. <b>Is the manuscript important for scientific community?</b><br/>(Please write few sentences on this manuscript)</p> <p>2. <b>Is the title of the article suitable?</b><br/>(If not please suggest an alternative title)</p> <p>3. <b>Is the abstract of the article comprehensive?</b></p> <p>4. <b>Are subsections and structure of the manuscript appropriate?</b></p> <p>5. <b>Do you think the manuscript is scientifically correct?</b></p> <p>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p> | <p>1. Although this topic is important, there are a lot of review articles that have described this topic much better than what has been narrated in this manuscript.</p> <p>2. It seems that is a suitable title</p> <p>3. In my opinion the abstract is not comprehensive. The topic is the role of ASC angiogenesis in breast reconstruction with fat grafting however the authors did not point out gaps and issues regarding the angiogenesis and grafting in the abstract.</p> <p>4. No, it is not. The authors need to include more subsections and structures elaborating scientific gaps regarding fat grafting, breast reconstruction, and biological mechanisms of adipose-derived stem cells. A subsection describing prior experimental and clinical trials on this topic is required.</p> <p>5. Yes, I think the manuscript is scientifically correct.</p> <p>6. No, they are not sufficient. In my opinion, a comprehensive literature review is required to complete the manuscript. After extending the manuscript, the authors need to include new relevant references in this manuscript.</p> <p>This manuscript is a mini-review that simply describes the topic just based on previous studies and reports without a critical discussion and future direction.</p> <p><b>A major revision is required. It is seriously recommended that the authors rewrite the manuscript.</b></p> |                                                                                                                                                                               |
