Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes , the article is important for scientific community . It has good review of the literature for artificial intelligence . However I had a few questions What does it mean by protocol -type prosthesis . I am aware of prototypes. Is the word protocol used because these prosthesis follow a conventional or digital workflows? The title also has the word Protocol in it .</p> <p>The abstract is comprehensive , has a typo Mechine instead of Machine in the fourth line.</p> <p>The structure of the manuscript is appropriate and is scientifically correct too.</p> <p>The references are quite recent , however I have a suggestion . Instead of writing the names of the references of at the end of each line in paranthesis, you can just put in the number for the reference as 1,2 ,3 . Also , please check the spelling of Franca , paraguassu , it is written as France , paraguassu in the references section in the end.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The vocabulary is good . Also another suggestion is to mention it as Camper's plane , Curve of Wilson , Curve of Spee, Curve of Monson and compensatory curves.</p>	
<p>Optional/General comments</p>	<p>Please review the format of the references in the last few pages , Overall the review is informative , would need some changes as mentioned above and clarification of the word Protocol ,</p>
