

## Review Form 1.7

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_114647
Title of the Manuscript:	A Holistic Review of Rosacea and its Association with Cardiovascular Diseases
Type of the Article	Review Article

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1.Yes. The manuscript provides an insight into the possible systemic associations of rosacea and prompts the treating physician to look beyond the skin in a patient with rosacea</p> <p>2.Yes</p> <p>3.yes</p> <p>.4.Yes.</p> <p>5. Yes</p> <p>6. The references are recent . I would suggest including few references on gut microbiome and rosacea eg.the role of skin microbiota and intestinal microbiome in rosacea by W Zhu published in frontiers february 2023</p> <p>7.</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>yes</p> <p>More non specific cation channel expression and density on sensory neurons and 'keratocytes' May be changed to 'keratinocytes'</p>	
<p><b>Optional/General</b> comments</p>	<p>1. since the manuscript targets a holistic review, i would suggest mentioning the possible role of gut microbiome in rosacea. The role of gut microbiome in maintaining a low grade systemic inflammation has been an area of recent interest and since both rosacea and CVD has been associated with a systemic proinflammatory state, the possible role of gut microbiome might be worth mentioning , atleast in a single sentence in this manuscript.</p> <p>2. One or 2 dermacopic findings in rosacea may be mentioned</p>
