

Review Form 1.7

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_111318
Title of the Manuscript:	Pharmacology and Therapeutic Features of COVID - 19 Infection inHodeidah , Yemen
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The importance of this article is modest as the subject of COVID treatment has advanced substantially since the time this study was made.</p> <p>The title gives the impression that the authors were not aware that important advances had been made since the study period. I have made a small addition (in blue print) to amend this point.</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Instead of settling for being a second class article, repeating what numerous authors observed 2 years ago. We can turn this into a high-value article by citing the following:-</p> <ol style="list-style-type: none"> No rebound or Long COVID in this study (authors please verify) vs the new treatment with Nirmatrelvir-Ritonavir etc. This simple treatment is applicable in all countries, even in the most under-privileged, and regardless of virus mutation. If the authors could sort out a group of co-infection of COVID plus malaria or any other endemic infection in the Middle East, it would turn this paper into a first class contribution. 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes, although there are many typo and possibly spelling mistakes which I have corrected in blue print.</p>	
<p>Optional/General comments</p>	<p>Any study on COVID is valuable and worth publishing. This article is no exception.</p>
