

**Editor's Comment:**

The paper seems like a review because it is a 25-year-old experiment. it is a collection of data from 2000 to 2019.

Remove materials and methods, results and discussion . Put subheading as per text.

In conclusion there is not scientific findings. It is common phenomena of thermophotoperiodic effects on phenology.

Some References are too old and irrelevant.

Hence, revise the paper and publish as a review.

**Editor's Details:**

Dr. Kamal Kant

Assistant Professor, Aspee Shakilam Biotechnology Institute, Navsari Agricultural University, India.
