In my opinion the microbiological diagnosis is lacking in this manuscript. Definitive diagnosis for sepsis required culture of sample from eye or blood sample which could have supported the bacterial sepsis with more authenticity. Microbiological culture could also have suggested the exact etiology thereby Initiating the appropriate therapy. Could have included some review article as reference .</p> | |
| <p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p> | <p>Yes</p> | |
| <p>Optional/General comments</p> | | |
