

Review Form 1.7

Journal Name:	European Journal of Nutrition & Food Safety
Manuscript Number:	Ms_EJNFS_115043
Title of the Manuscript:	A sustainable approach to combat micronutrient deficiencies and ensure global food security through Bio fortification
Type of the Article	Review

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Yes, the manuscript objectives and contents are important for scientific community</p> <p>2. The title of the article sounds suitable. However, the second purpose of ensuring global food security has not quantitatively proved by scientific data.</p> <p>3. Yes, the abstract of the article is comprehensive enough.</p> <p>4. I agreed with subsections and structure of the manuscript which are rather appropriate. But as for me, the subsection of "Results" should be split into each other suitable subsections such as introduction, importance of micronutrients, conventional breeding, genetic engineering, comparing and combining methods, targeted crops and nutrients, combining traits and crops, conventional breeding approaches, genetic engineering approaches, challenges and limitations etc., by this way, readers can have an overview of theory and practical data together in each paragraph.</p> <p>5. I think the manuscript is scientifically correct.</p> <p>7. The references are sufficient and recent. Authors please update references in 2021, 2022, 2023 if available, because I found only 10 references in 2000 out of 100 references.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>English quality of the article is suitable for scholarly communications.</p>	
<p>Optional/General comments</p>	<p>1. The title mentioned about "ensure global food security through Bio fortification" and at the end of introduction section mentioned about "the role of bio fortification in achieving the Sustainable Development Goals". However, in all sections, I have not found the data and discussion on the above mentioned questions.</p> <p>2. Some other minor amendments were suggested in the Re-manuscript (in red fonts) attached.</p>
