

Review Form 1.7

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_114449
Title of the Manuscript:	An Evaluation of Anti-hyperlipidemic Activity of Ethanolic extract of Moringa oleifera on High Fat Induced Hyperlipidemic Rat Model
Type of the Article	Original Research Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes</p> <p>Yes</p> <p>No</p> <p>No</p> <p>Yes</p> <p>Yes</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<p>1. Since its Research article abstract and mail paper also should follow IMRAD format Introduction, Methodology Result and Discussion</p> <p>2. Methodology like how many rats used, what is the dosage studied should be mentioned in the abstract</p> <p>3. In results section both in the abstract and main paper, Since its about lipidemia it is better to mention the lipid levels followed by Liver and Kidney function</p> <p>4. Paper is about anti hyperlipidemic property but introduction is only about liver & hepatoprotective. There is no mention about high cholesterol, lipidemia its complication etc.</p> <p>5. The topic is antihyperlipidemic but its given "to evaluate the hepatoprotective" as the objective</p> <p>6. IAEC Number Not mentioned</p> <p>7. Induction of hyperlipidemia in rats this should come first prior to Experimental design</p> <p>8. In Page no 6 it has been mentioned wrongly as 100 rats and 14 groups instead of 90 rats and 9 groups</p> <p>9. Blood collection from the rat was not clearly mentioned</p> <p>10. Discussion should be elaborate and should not be clubbed with results</p> <p>11. Conclusion should be more clear</p>
