

Review Form 1.7

Journal Name:	International Journal of Medical and Pharmaceutical Case Reports
Manuscript Number:	Ms_IJMPCR_114628
Title of the Manuscript:	Through Indian Eyes: A Case Series on Steroid-Induced Secondary Cataract
Type of the Article	Case report

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes, the manuscript is important to the scientific community.</p> <p>However, the title 'Through Indian Eyes' doesn't justify the manuscript as, only 2 cases of India are included in the study. And moreover, going through the cases, it doesn't justify if heavy amount of topical steroid was used and in which areas predominantly?</p> <p>The other doubt is regarding the concurrent oral steroid being the culprit for cataract. Neither the dose nor the frequency of the steroids have been clearly mentioned.</p> <p>The way for presenting both case reports is vague, and the second one is cut short. Make sure that either of the cases are presented in the same way with all the necessary points (dosing, area applied, frequency, duration of use and any concurrent medication used)</p> <p>Please mention if there are any previous similar case reports or any studies done prior to this study.</p> <p>Also the Introduction part is more focused on lichen planus rather than the topic of interest, it needs to be modified.</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	yes	
<p>Optional/General comments</p>
