

Review Form 1.7

Journal Name:	Asian Journal of Medicine and Health
Manuscript Number:	Ms_AJMAH_115103
Title of the Manuscript:	Idiopathic Bilateral Wunderlich Syndrome: a case report
Type of the Article	Case report

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><u>Compulsory</u> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p>	
<p><u>Minor</u> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>YES</p>	
<p><u>Optional/General</u> comments</p>	<p>1. Importance for Scientific Community: This manuscript presents a significant case of idiopathic bilateral Wunderlich Syndrome, a rare condition with potentially life-threatening consequences. Understanding and documenting such cases are crucial for expanding knowledge within the medical community, especially regarding diagnosis and management of rare renal conditions. Therefore, this manuscript holds importance for the scientific community, offering valuable insights into the diagnosis and treatment of Wunderlich Syndrome.</p> <p>2. Suitability of Title: The title "Idiopathic Bilateral Wunderlich Syndrome: a case report" effectively conveys the main focus of the manuscript. It accurately reflects the rarity and uniqueness of the case presented. No alternative title suggestions are needed as the current title adequately captures the essence of the manuscript.</p> <p>3. Comprehensiveness of Abstract: The abstract provides a comprehensive overview of the manuscript, summarizing the background, case presentation, diagnostic approach, and key findings. It effectively highlights the rarity of bilateral idiopathic Wunderlich Syndrome and emphasizes the importance of imaging studies in diagnosis. Therefore, the abstract is well-structured and informative.</p> <p>4. Appropriateness of Subsections and Structure: The manuscript follows a clear and logical structure, with distinct sections including Introduction, Presentation of Case, Discussion, and Conclusion. Each subsection is appropriately organized, providing relevant information and contributing to the overall coherence of the manuscript. Therefore, the subsections and structure are appropriate for effectively conveying the case report.</p> <p>5. Scientific Correctness: The manuscript appears scientifically sound, with a detailed presentation of the clinical case, diagnostic findings, and treatment outcomes. The information presented aligns with established medical knowledge regarding Wunderlich</p>

	<p>Syndrome. However, a thorough peer review process may further validate the scientific accuracy of the manuscript.</p> <p>6. Sufficiency and Recency of References: The references provided offer a comprehensive review of relevant literature, including historical context and recent studies. However, additional references could enhance the manuscript's comprehensiveness. Specifically, including recent studies on imaging modalities and management strategies for Wunderlich Syndrome may further strengthen the discussion section. Some potential additional references could include recent publications on advanced imaging techniques such as MRI and CT, as well as emerging treatment options for Wunderlich Syndrome.</p> <p>Overall, the manuscript provides valuable insights into a rare and clinically significant condition, effectively contributing to the scientific understanding of Wunderlich Syndrome.</p>
