

Review Form 1.7

Journal Name:	Asian Journal of Research in Computer Science
Manuscript Number:	Ms_AJRCOS_114879
Title of the Manuscript:	Influence of AI: Robotics in healthcare
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> 1. The manuscript titled "Influence of AI: Robotics in Healthcare" is indeed important for the scientific community. It addresses the significant impact of artificial intelligence (AI) and robotics on healthcare, which is a rapidly evolving field with profound implications for patient care, medical procedures, and healthcare delivery systems. The integration of AI and robotics in healthcare promises to enhance the efficiency of medical services, improve patient outcomes, and reduce costs, making it a topic of high relevance and interest among researchers, practitioners, and policymakers in the scientific and medical communities. As such, contributions to this field are valuable for advancing knowledge, guiding future research, and informing the development of innovative healthcare solutions. 2. The type of study is not clear from the title. 3. The abstract of the article is poorly presented. The methods of conducting a review study, as well as the results and conclusions, are not presented <p>4. Title: Do not use abbreviations in the title. The type of study is not clear from the title. Abstract: The abstract of the article is poorly presented. The methods of conducting a review study, as well as the results and conclusions, are not presented. Introduction: Clarity and Focus: The introduction could benefit from a clearer structure. It currently covers a wide range of topics, which might overwhelm the reader. Consider focusing on a few key points and expanding on them with more depth. Method: The methodology is not presented in this work. Which keywords and which databases were used for the search? The inclusion and exclusion criteria of the studies and the method of data analysis are not provided. Results: Ethical and Social Implications: The paper could address the ethical and social implications of robotics in healthcare, such as patient privacy, data security, and the potential impact on the workforce. This would provide a more holistic view of the technology's integration.</p> <ol style="list-style-type: none"> 5. The manuscript requires revision. The methodology, databases to be searched, keywords and strategies, as well as the inclusion and exclusion criteria, are not mentioned in the manuscript. The results should be presented in the framework of review studies. 6. The references are somewhat appropriate 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 		
<p>Optional/General comments</p>
