<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>I don't have the competence to comment on this</p>	
<p>Optional/General comments</p>	<p>The introduction is not systematic and there is no connection between one paragraph and the next paragraph. The introduction does not describe the state of the art of this research so the purpose of this article is unclear. The method is unclear and does not fully describe the procedures for obtaining data and analysis. The data presented in Figures 1, 2 and 3 only presents production price data without taking into account other prices that influence the production of a product. The price of the product obtained cannot be compared with the price of a commercial product because the price item does not take into account other prices of a unit cost of commercial product costs such as electricity, advertising, distribution, management and others.</p>
