

Review Form 1.7

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_113837
Title of the Manuscript:	A Polyherbal Formulation's (Storg B) In vitro Antioxidant, In vivo Bioavailability and Immunomodulatory Effects on Experimental Animal Model Induced by Cyclophosphamide
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. This research has potential applications in the medical domain. These days, a lot of research is being done on the immunomodulatory qualities of plants since they have a large variety of bioactive substances that can be used to treat immunomodulatory illnesses. Determining the effectiveness of the standardized polyherbal formulation Storg-B was the goal of the current study. Citrus limon, Mangifera indica, and Psidium guajava are combined in this polyherbal mixture.</p> <p>2. The article's title is appropriate.</p> <p>3. Overall, the research is appropriate. However, because they are using laboratory animals for their studies, researchers need to exercise extraordinary caution. Consequently, by enhancing immune response, the polyherbal formulation Storg-B may be utilized as a safe, effective treatment for immunological insufficiency.</p> <p>4. As a whole, the study is relevant. However, researchers must proceed with extreme caution because they are utilizing laboratory animals in their investigations. Therefore, the polyherbal formulation Storg-B may be used as a safe, efficient treatment for immunological deficiency by boosting immune response.</p> <p>5. Good</p> <p>6. very good</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>
