

Editor's Comment:

The paper is accepted with minor revision

- Please, write the aim of work at the end of section of introduction.
- Please, write the short notes on statistical analysis used in study at the end of section of Methods.
- In section of discussion, Please, add the following after this sentence “. All the patients in this study were within the reproductive age group.”:

This finding may run in the same line with Hegazy's new hypothesis, which suggests that ovarian germ cell tumors can occur at reproductive age in females through fusion of the polar body with the secondary oocyte.

Hegazy AA, Al-Qtaitat AI, Hegazy RA. A new hypothesis may explain human parthenogenesis and ovarian teratoma: A review study. Int J Reprod Biomed. 2023 May 8;21(4):277-284. doi: 10.18502/ijrm.v21i4.13267. PMID: 37260553; PMCID: PMC10227352.
