<p>CompulsoryREVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write fewsentenceson this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the articlecomprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apartfromabovementioned6points,reviewersarefreetoprovideadditional suggestions/comments)</u></p>	<p>ANS 1:The significance ofthis manuscriptcannotbe overstated,as germ cell tumors representa substantial portion,approximately 30%,of ovariantumors,predominantly manifesting as mature cysticteratomas.Furthermore,these tumors emerge asthe most prevalent ovarian malignancyin individuals within the firsttwo decades oflife,underscoringthe criticalimportance ofunderstanding their patterns and characteristics.</p> <p>ANS 2: "EPIDEMIOLOGICAL TRENDS, CLINICAL CHARACTERISTICSAND OUTCOMES OF OVARIAN GERM CELL CANCERIN WOMEN: A RETROSPECTIVE STUDY FROMA TERTIARY HOSPITALIN PORT HARCOURT,SOUTHERN NIGERIA"</p> <p>ANS 3: The abstract thoroughly and extensivelyinvolves all therequiredinformation.</p> <p>ANS 4: Itwould be better to addlimitations andrecommendationsinthesubsections of manuscript.</p> <p>ANS 5: Although the manuscriptis scientifically sound,itwould be more appropriate to include mean and standard deviation forall variablesinthe study.Currently,onlythe standard deviation for age has beenreported.</p> <p>ANS 6:The cited references provide adequate supportforthe manuscript's scientific validity.</p> <p>(The data reveals only one case ofexpiry within a six-month period;however,the follow-up duration of monthsis consideredtoo brief foradequately assessing malignancies. Itisrecommendedto extendthe follow-up periodiffeasible to ensure comprehensive data analysis.Moreover,itis advisableto provide additionaldetail regardingthe deceased patient,specifying whether they were diagnosed with immatureteratoma or yolk sactumorforenhanced clarity and completenessinthe analysis. Iwouldrecommend modifying Table3to providea more comprehensive overview of treatmentoptions.Instead ofsolelylisting surgeries,consider renamingthe headingto"Treatment Options"andincluding an additionalcolumn specifying "Hysterectomyplus Bilateral salpingo-oophorectomy plus Chemotherapy" to offera moreinclusiverepresentation of the treatments administered.)</p>	
<p>MinorREVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The linguistic quality ofthis article is highly suitable forscholarly communications.</p>	
<p>Optional/Generalcomments</p>
